Description of modifications:

Eleven (11) 700MHz frequency pairs assigned to Montgomery County have been consolidated and FCC applications have been created under Montgomery County's FRN. The coverage contours, site locations and technical parameters will remain as documented in the original City of Houston application. This allows the City of Houston to utilize these frequencies while maintaining Montgomery County as the licensee.

► **Region 51**

This letter is to inform Region 51 that Montgomery County concurs with the plan to allow usage of frequency pairs listed below in accordance with the recently filed applications from the City of Houston and Harris County. Montgomery County will be the legal licensee for these frequencies but will allow the City of Houston usage for the regional radio system. This frequency rearrangement in the region is necessary because of the City of Houston and Harris County will be migrating from analog to digital formats. We realize that this plan reallocates frequencies previously planned for use in our County. However, we are willing to make this concession to promote interoperability region-wide. We have been assured that once the transition from analog to digital is completed, additional frequencies would be available if needed. In the event additional frequencies are needed by Montgomery County in the future, the City of Houston, Harris County, and the State of Texas have given their assurance to help us identify and license those available frequencies. This new arrangement will cause less chance of interference within the region as well as to the adjacent regions. The City of Houston as well as Harris County is committed to assisting the region with any frequency coordination and/or interference issues that may arise.
